### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR

1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with John E. Curtin on 24 January 2006

The application has been amended as follows:

- a.) In claim 17, line 3, change "the respective" to "a respective".
- b.) In claim 30, line 8, insert "of" between "plurality" and "sub-stream" and change "component" to "components"
- c.) In claim 31, line 3, delete the word "one" before "sub-stream".

2. The following changes to the drawings have been approved by the examiner and agreed upon by applicant: In the Figure set; Fig. 11/11 is mislabeled as Fig. 7. The "Fig. 7" should be replace with "Fig. 11".

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a method and apparatus for increasing the capacity of a multiple- input and/or multiple-output system. A search of prior art references has failed to disclose a method comprising the steps of:

“transmitting at least a portion of a processed sub-stream, the processed sub-stream representing one of the plurality of sub-streams, the processed sub-stream including a plurality of strata, each stratum of the processed sub-stream representing a respective sub-stream component of the one sub-stream” as disclosed in claim 1.

“transmitting at least a portion of each of a plurality of processed sub-streams, each one of the processed sub-streams representing a respective one of the sub-streams, each processed sub-stream including a plurality of strata, each stratum of each processed sub-stream representing a respective one of the sub-stream-components of one of the component data streams represented by that processed sub-stream “ as disclosed in claim 10.

“(a) decoding at least a portion of one of the strata to obtain at least a portion of a respective sub-stream component, the decoding step further comprising separating out and decoding the portion of the stratum to obtain the sub-stream component portion; (b) removing the decoded portion of the one stratum from the received signal, the removing step further comprising re-encoding the

Art Unit: 2611

decoded portion to obtain the one stratum and subtracting the re-encoded stratum from the received signal; and (c) decoding at least a portion of another of the strata to obtain at least a portion of a respective sub-stream component” disclosed in claim 20.

Nor does the prior art disclose “a transmitter for use in a system adapted to communicate at least a portion of a primitive data stream, the primitive data stream including a plurality of sub-streams, the transmitter comprising: a first stratifier that stratifies one of the component data streams into a processed sub-stream, the processed sub-stream component having a plurality of strata, each stratum of the processed sub-stream representing a respective one of a plurality of sub-stream components of the one sub-stream” as disclosed in claim 30.

Nor does the prior art teach a receiver comprising; “a processor having an input coupled to the outputs of the receive antennas, the processor operable to receive a signal from the receive antenna signals, and comprising: a strata processor operable to decode at least a portion of one of the strata by separating out and decoding the portion to obtain at least a portion of a respective sub-stream component; an encoder/modulator operable to remove the decoded portion of the stratum from the receive signal and to re-encode the decoded sub-stream component to obtain the respective stratum; and a combiner for subtracting any re-encoded stratum from the received signal, the processor further operable to decode at least a portion of another of the strata to obtain at least a portion of a respective sub-stream component” as disclosed in claim 41.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
